TRINETRA OSINT

Comprehensive Digital Footprint & Threat Assessment

Defensible Open Source Intelligence & Digital Footprint Dossier

CASE:
CONFIDENTIAL
CASE-2026-0881
CONFIDENTIAL

Case Identifier:	CASE-2026-0881
Lead Investigator:	Chief OSINT Specialist M. Sharma
Generated Timestamp:	2026-10-25 15:53:43 UTC
Investigation Purpose:	Authorized Digital Footprint Assessment & Identity Corroboration
Platform Version:	TRINETRA Core v1.0.0
Privacy Redaction:	Standard (Full Disclosure)

1. Executive Summary

> An investigation into target entities confirmed active development presence on GitHub [fnd_usr_01]. Associated social footprint was corroborated on Twitter/X under handle variant alex_devsec [fnd_usr_02]. Domain infrastructure routing was validated via DNS MX exchangers [fnd_eml_01] and Certificate Transparency logs [fnd_eml_02]. Public telecommunication records map the associated inquiry number to a California mobile allocation [fnd_phn_01]. Forensic image evaluation extracted metadata confirming capture via Sony A7 IV [fnd_img_01]. Gated onion indexing noted a single historical text paste mentioning the corporate domain [fnd_drk_01].

2. Scope & Methodology

This investigation targeted entity artifacts associated with **Comprehensive Digital Footprint & Threat Assessment**. All inquiries followed defensible open-source intelligence doctrines. Sources queried include:

CASE:
CASE-2026-0881
CONFIDENTIAL

- **Username Enumeration:** Validated profiles across 500+ internet platforms, forums, code hosts, and social directories.
- **Email & Infrastructure:** RFC 5322 syntax validation, authoritative DNS MX exchangers, RDAP registry queries, and Certificate Transparency logs.
- **Phone Footprint:** ITU-T numbering plans, carrier/line-type allocation, and public web footprint indexes (strictly excluding consumer people-search brokers).
- **Image Provenance:** EXIF metadata extraction, GPS coordinate parsing, Error Level Analysis (ELA) for manipulation triage, and perceptual hash indexing (zero facial recognition).
- **Dark Web Mentions:** Ahmia onion search indexing under rigorous multi-layer safety gating, content sanitization, script stripping, and hard-block keyword filtering.

3. Analyst Narrative & Corroborated Insights

The subject exhibits a high-visibility open-source development profile [fnd_usr_01]. Infrastructure analysis reveals consistent deployment of enterprise security controls including Google Workspace and TLS certificates [fnd_eml_01] [fnd_eml_02]. All findings represent publicly indexable entries gathered under lawful purpose [fnd_usr_01].

4. Evidence Findings (Corroborated & Leads)

Each finding below carries a cryptographic identifier, exact URL reference, evidence snippet, and calibrated confidence rating.

Finding ID	Target	Source / Module	Confidence	Evidence Snippet & Exact URL
[fnd_usr_01] VERIFIED	alex-devsec	**GitHub** Module: username	96%	Active public profile with 38 repositories, member of DevSecOps org. Last commit 2 days ago. **URL:** https://github.com/alex-devsec *Rationale: Direct profile HTTP 200 with matching bio token.*
[fnd_usr_02] VERIFIED	alex_devsec	**Twitter/X** Module: username	91%	Verified handle claiming Security Researcher role. Pinned thread links to personal portfolio. **URL:** https://x.com/alex_devsec *Rationale: Handle exact match on primary social platform.*
[fnd_eml_01] VERIFIED	alex-security.io	**DNS MX Resolver** Module: email_domain	99%	Mail exchangers resolve to Google Workspace (aspmx.l.google.com). SPF record enforced. **URL:** dns://alex-security.io/MX *Rationale: Authoritative DNS MX query confirmed active routing.*
[fnd_eml_02] VERIFIED	alex-security.io	**crt.sh Certificate Transparency** Module: email_domain	95%	Discovered active subdomain api.alex-security.io logged in Let's Encrypt certificate transparency audit log. **URL:** https://api.alex-security.io *Rationale: Cryptographic TLS issuance record in global CT log.*
[fnd_phn_01] VERIFIED	+1 415-555-2671	**ITU-T Telecommunication Registry** Module: phone	98%	Valid North American mobile number (+1 415-555-2671). Assigned carrier range: T-Mobile USA. Region: San Francisco, California. **URL:** tel:+14155552671 *Rationale: Authoritative libphonenumber E.164 syntax and carrier range allocation.*
[fnd_img_01] VERIFIED	headshot.jpg	**EXIF Metadata Extractor** Module: image	97%	Camera: Sony A7 IV. Exposure: 1/250s at f/2.8. Captured: 2025-08-14 16:22:10. Software: Lightroom v12.1. GPS coordinates embedded in header: 37.7749, -122.4194. **URL:** embedded://media/headshot.jpg *Rationale: Parsed direct EXIF tags from supplied artifact.*
[fnd_drk_01] UNVERIFIED	alex-security.io	**Ahmia Onion Search Index** Module: darkweb	82%	Metadata mention: Public pastebin repository referencing monitored domain alex-security.io. [Scripts stripped, media download blocked] **URL:** http://pasteonionexample5xyz.onion/raw/alex-sec *Rationale: Indexed public onion search hit referencing monitored domain string.*

5. Chronological Timeline

Reconstructed temporal sequence based on archive timestamps, EXIF headers, and registration events:

Timestamp / Event Date	Source	Chronological Observation
2026-10-25T14:10:00Z	**GitHub**	Active public profile with 38 repositories, member of DevSecOps org. Last commit 2 days ago.... `[fnd_usr_01]`
2026-10-25T14:11:15Z	**Twitter/X**	Verified handle claiming Security Researcher role. Pinned thread links to personal portfolio.... `[fnd_usr_02]`
2026-10-25T14:12:00Z	**DNS MX Resolver**	Mail exchangers resolve to Google Workspace (aspmx.l.google.com). SPF record enforced.... `[fnd_eml_01]`
2026-10-25T14:12:30Z	**crt.sh Certificate Transparency**	Discovered active subdomain api.alex-security.io logged in Let's Encrypt certificate transparency audit log.... `[fnd_eml_02]`
2026-10-25T14:14:00Z	**ITU-T Telecommunication Registry**	Valid North American mobile number (+1 415-555-2671). Assigned carrier range: T-Mobile USA. Region: San Francisco, Calif... `[fnd_phn_01]`
2026-10-25T14:16:00Z	**EXIF Metadata Extractor**	Camera: Sony A7 IV. Exposure: 1/250s at f/2.8. Captured: 2025-08-14 16:22:10. Software: Lightroom v12.1. GPS coordinates... `[fnd_img_01]`
2026-10-25T14:18:00Z	**Ahmia Onion Search Index**	Metadata mention: Public pastebin repository referencing monitored domain alex-security.io. [Scripts stripped, media dow... `[fnd_drk_01]`

CASE-2026-0881

6. Relational Link Graph

CONFIDENTIAL

Identified **19 interconnected entities** connected via **14 evidentiary relationships**.

> Graph connectivity establishes high-confidence bridges between target usernames, associated emails, domain hosts, and public listings. No speculative bridges were synthesized.

7. Chain of Custody & Hash Manifest

Tamper-Evident SHA-256 Digest Manifest

Item ID	Source	SHA-256 Digest	Capture Time
